

Self-archiving

If you would like to re-publish ("self-archive") a journal article or another paper via the "Green Road" of Open Access in the Research Collection, you need to comply with the copyright policies of the original publisher.

Article version

Many publishing houses permit the publication of either **preprints** or **postprints (also called Author's Accepted Manuscript, short AAM)** of published articles in an institutional repository such as the Research Collection.

A **preprint** is the manuscript version of an article as submitted to the publisher, i.e. before peer review.

A **postprint** is the accepted manuscript after the peer review process. The postprint...

- is the final author's manuscript accepted by the publisher for publication
- contains all the revisions made in the course of the peer review process
- is equivalent to the published version in terms of content
- is designed by the author
- does not have a publisher layout or contain any publisher logos

Publishing houses rarely allow the use of the **publisher PDF** for publication in a repository.

Embargo

Some publishing houses only permit the publication of articles in repositories after a so-called **embargo** from the first publication date. The embargo generally varies between 6 to 36 months.

You can nevertheless submit your article at any time to the Research Collection. When uploading the file, indicate the embargo end date - your file will then be automatically made available to external users on this day while only metadata will be visible immediately.

Where to look up publisher copyright policies?

The [SHERPA/RoMEO database](#) provides information on self-archiving guidelines of many scholarly journals and publishers.

Please consider however, that in case of doubt only those regulations actually stipulated in your publishing contract (Copyright Transfer Agreement, Licence to Publish) are legally binding.

In the absence of a publishing contract, the publisher's general terms and conditions apply.

Example

The following example of an entry in SHERPA/RoMEO for the journal "Advances in Intelligent Systems and Computing" tells you that...

- you are allowed to publish a preprint
- you are allowed to publish a postprint in an open access repository after an embargo of 12 months
- you are not allowed to publish the publisher's version

Published by:	Springer Verlag (Germany) - Green Policies in RoMEO

This summary is for the journal's *default* policies, and changes or exceptions can often be negotiated by authors.
All information is correct to the best of our knowledge but should not be relied upon for legal advice.

Self-archiving as part of a doctoral thesis (cumulative doctoral thesis)

Some publishers have special conditions for reusing content within doctoral theses that are more generous than what is documented in [Sherpa/Romeo](#). You can find more information on this topic on the page [Cumulative doctoral theses](#).
