

# Export RIS, BibTex or CSV

## Export limit

You can export results lists with a maximum of 500 items.

If you need an export of a search result with more items, please [contact us](#) and let us know which content the required export file should comprise. We will then send you the file via email.

## How to import CSV files to Excel

To open the CSV export file directly with Excel, you must set the default list separator in your Windows system settings to "," (comma) instead of ";" (semicolon).

Alternatively, you can import the export file into Excel as follows:

1. Save the export file on your computer.
2. Open an empty spreadsheet in Excel.
3. Click on the "Data" tab.
4. In the "Get External Data" section, choose "From Text".
5. Import the CSV file.
6. Choose "Delimited" as file type.
7. Choose "65001 : Unicode (UTF8)" as file origin.
8. Check to box "My data has headers".
9. Click on Next.
10. Choose "Comma" as delimiter.
11. Click on Next.
12. Define the data format for columns that contain a date, especially dc.date.issued, as "Text"
13. Click on Finish.
